1.3.9 Bill Invoice Management

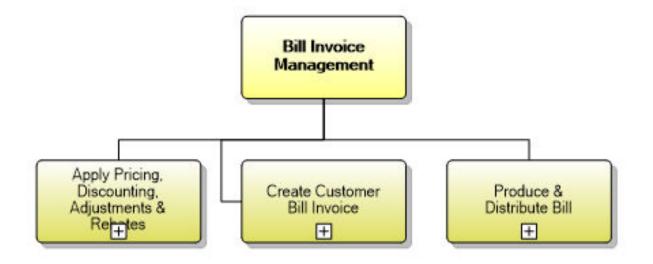

Figure 1: 1.3.9 Bill Invoice Management decomposition

Bill Invoice Management

Process Identifier: 1.3.9

Brief Description

Ensure the bill invoice is created, physically and/or electronically produced and distributed to customers, and that the appropriate taxes, discounts, adjustments, rebates and credits for the products and services delivered to customers have been applied. A

Extended Description

Bill Invoice Management processes ensure the bill invoice is created, physically and/or electronically produced and distributed to customers, and that the appropriate taxes, discounts, adjustments, rebates and credits for the products and services delivered to customers have been applied. These processes are accountable for assuring that enterprise revenue is billed and invoices delivered appropriately to customers.

These processes are responsible for, but not limited to:

 Establishment and application of taxes and charges to the services delivered to customers;

Application of the adjustment (adjustment decision done in Bill Inquiry Handling);
Creation of accurate bill invoices including all adjustments, rebates, discounts, credits, etc.

 Production & distribution of bill in physical and/or electronic form to customers in accordance with the billing cycle;

 Forecasting of physical resources associated with bill production, such as paper and envelope quantities;

Alignment and management of promotional material insertion into distributed bills
 Establishment and management of third party arrangements to support bill invoice generation, production and distribution. A

This L2 Process is defined in detail with L3 processes. Refer below L3 processes and shared artifacts

1.3.9.1 Apply Pricing, Discounting, Adjustments & Rebates

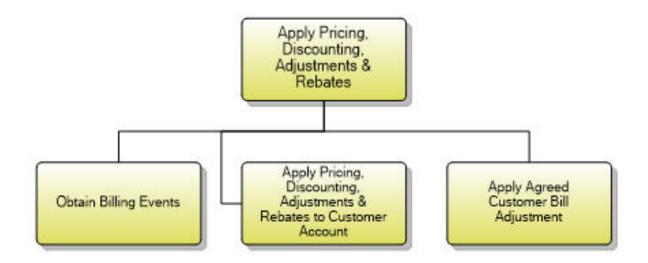

Figure 2: 1.3.9.1 Apply Pricing, Discounting, Adjustments & Rebates decomposition

Apply Pricing, Discounting, Adjustments & Rebates

Process Identifier: 1.3.9.1

Brief Description

Ensure that the bill invoice is reflective of all the commercially agreed billable events and any bill invoice adjustments agreed between a Service Provider and the customer. A

Extended Description

The purpose of the Apply Pricing, Discounting, Adjustments & Rebates process is to ensure that the bill invoice is reflective of all the commercially agreed billable events and any bill invoice adjustments agreed between a Service Provider and the customer.

In addition, it ensures that the appropriate taxes, rebates (i.e. missed customer commitments) and credits are applied to the customer's bill invoice(s). This process contains the account and customer specific pricing, charges, discounting, credits and taxation for services delivered to the customer by the Service Provider. It accepts events that have been collected, translated, correlated, assembled, guided and service rated. It takes these events and determines the account or customer specific pricing, charges, discounts, and taxation that should be delivered to the invoice(s) for the customer. It reviews any agreed adjustments agreed in the previous billing period and includes these to the bill invoice. This process can occur in real-time as events are service rated or can be on a scheduled on a periodic basis at the Service Provider's discretion.

When billing system generates feed file with all appropriate billing events, Smart Invoice pro takes input generated from billing system in multiple formats and generates output in multiple format (Pdf, XML, iPDF, AFP, PS) - electronic and physical bill invoice. Smart Invoice Pro delivers a secure and reliable electronic and Physical billing solution architected keeping the end user in mind.

1.3.9.2 Create Customer Bill Invoice

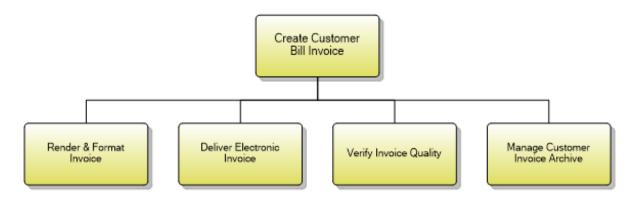

Figure 3: 1.3.9.2 Create Customer Bill Invoice decomposition

Create Customer Bill Invoice

Process Identifier: 1.3.9.2

Brief Description

Production of a timely and accurate invoice in accordance with the specific billing cycles and reflective of the final charges for services, together with any adjustments, delivered to the customer by the Service Provider and respective other parties. A

Extended Description

The primary purpose of the Create Customer Bill Invoice process is the production of a timely and accurate invoice in accordance with the specific billing cycles and reflective of the final charges for services, together with any adjustments, delivered to the customer by the Service Provider and respective other parties. A

• Smart Invoice pro generates bills as per assigned bill cycles which can be configured via UI.

This process contains the invoicing components of the Service Provider's business. This includes the rendering/formatting of an invoice, the delivery of an electronic copy of an invoice to customers and the processes that verify invoice quality prior to distribution to the customer in electronic form, or to the process responsible for physical invoice

production and distribution. The flow of this process can be viewed as an extension of the company's e-business strategy. In this case, the Service Provider would render an invoice electronically, via the Internet for example. A

- Smart invoice Pro will accept inputs from any billing system in any format
- Then the input will be converted into XML format
- Then from the converted input, required data will be rendered and will generate output in various formats
- Then Merger will merge the output files based on the configuration made
- Outputs Pdfs will be dispatched to customer on their emails and in case of delivery failure, bounce email and report will be generated.
- AFP (Advance Function Printing) files will also be generated and moved to an external location for printing.
- Before dispatching invoice to the customers, it validates bill to prevent bill shock to the customer.

Furthermore, this process provides specifications for the formatting of invoices in different ways and to achieve different publishing possibilities and supports the creation of different invoice formats for different publication media. The process is further responsible for splitting and re-arranging invoices for customers (particularly customers with complex account structures) according to agreements made with these customers.

Α

• Template can also be selected based on customer segment, region and other factors.

Additionally, these processes store the customer invoice for a period of time to address regulation and/or internal requirements, during which they can be accessed to support any customer or regulator agency inquiries on bill invoices. A

- Generated invoices can be saved for x (x is configurable) no. of months and same invoices can be fetched for supporting inquiry and duplicate bill request by customer
- Once pdf and AFP files generated, pdf invoices will be dispatched via emails and AFP files to third party vendors
- Before dispatching invoice to the customers, it validates bill to prevent bill shock to the customer.

1.3.9.3 Produce & Distribute Bill

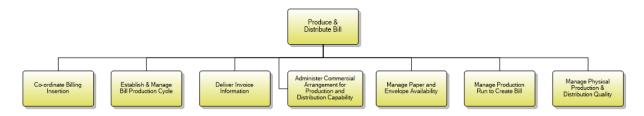

Figure 4: 1.3.9.3 Produce & Distribute Bill decomposition

Produce & Distribute Bill

Process Identifier: 1.3.9.3

Brief Description Physical production and distribution of bills to customers in accordance with the specified billing cycle. A

Extended Description

The purpose of the Produce & Distribute Customer Bill Invoice process is the physical production and distribution of bills to customers in accordance with the specified billing cycle. This process is responsible for all activities associated with ensuring a physical bill is delivered to customers. A

- AFP (Advance Function Printing) files/ PS (Post script) will be generated and moved to an external location for printing.
- Printed invoice will be dispatched to the customer
- Keeps track of dispatched invoices

The responsibilities of the process include, but are not limited to: • Establishing and managing the physical bill production cycle; A

Smart invoice generates AFP (Advanced Function Printing) and PS (Post script) files

• Establishing the requirements for, and managing the agreed commercial arrangements with, appropriate outsourced suppliers of the production and distribution capabilities; *This is not in scope*

• Delivery of invoice information to the physical production processes; A

AFP (Advance Function Printing)/ PS (Post script) files will be generated and moved to an external location for printing

 Coordinating with promotional processes for any billing insertions to be included with the bill; A

Smart Invoice provides the feature insert promotional images and videos in the bill invoice

Best Fit plan – Smart Invoice pro monitors usage and send alerts to the customer for best packages

 If internal processes are used, managing availability of paper and envelope volumes to meet the needs of the physical production process;

Smart Invoice Pro provides the number of pages required for Bill Invoice

 If internal production facilities are used, managing the production runs to create the bills A

Smart Invoice Pro generates print ready AFP/PS files for configured bill cycles and keeps track of dispatched invoice

Quality management of the physical production and distribution processes. A

Before dispatching invoices are being validated to ensure quality.

Bill shock prevention - Smart Invoice Pro monitors bill trends of the customer and identifies more than x% variance and bill tagged for verification
