

API Simulator Sandpit – Managing MEF Services

Feb 08, 2017

Champion Confirmed	Champion Tentative	Participant Confirmed	Participant Tentative
MEF	Telstra	DGIT Systems	
PCCW	Vodafone	Inomial	
	Orange	TMNS	

We are still looking for: More champions and participants

- **As a Buyer of Ethernet Services**
- **I need to** Operationally Integrate with a Supplier
- **so that I can** Programmatically order, track and manage MEF 6.2 compliant services they supply me with via TMForum APIs
- **To do this I need to** use APIs for order placement, order management,
- **I know that I am successful when** *(1) I can use APIs to manage an e2e order to activate process for the components of an EVPLAN Service (2) I can model the service components in a catalog and use manage with dynamic APIs.*

- **As a Supplier of Ethernet Services**
- **I need to** Operationally Integrate with a Buyer
- **so that I can** Supply MEF 6.2 compliant services they via TMForum APIs
- **To do this I need to** use APIs to capture orders, expose order management functions, expose inventory and catalogs
- **I know that I am successful when** *I can model the service components in a catalog and support buyer self-service through dynamic APIs*
