Developing a new model for Architecture Governance

Dr Lester Thomas
Chief Systems Architect, Vodafone Group
Future success depends on transformation of operations & IT

- Zero-touch, AI-driven, software-defined operations (business & technology)
- Designed to deliver agility, efficiency & interoperability – to stay competitive
It’s time to rethink the role of technology: from cost center to agility enabler.

2000s Mindset
Cost-centric: “Reduce the 5%”

2018 Mindset
Impact-centric: “Transform the 95%”
Flip IT strategy

From order taker to recipe maker
Re-think the position of IT in your organisation
Developing a new model for Architecture Governance
