introducing

TM Forum API conformance certification badges

As members achieve Open API conformance certification, they earn certification badges which they can use to promote the certification of their software products and solutions. Benefits of achieving Open API conformance certification include TM Forum promotion of these certifications:

- Publication on tmforum.org
- Certification report
- Added to company profile webpage
- Certification badge

TM Forum has worked with our members to release more than 50 Open APIs through a dedicated portal. These Open APIs enable an open digital ecosystem, provide critical management functionality to digital services, reduce time-to-market, and improve cost-effectiveness and revenue sharing.

Additional benefits are offered for companies achieving multiple Open API conformance certifications, as outlined below:

Open APIs BRONZE CERTIFIED	Open APIs SILVER CERTIFIED	Open APIs GOLD CERTIFIED	Open APIs PLATINUM CERTIFIED	Open APIs DIAMOND CERTIFIED
Number of APIs certified 1-3	**Number of APIs certified** 4-9	**Number of APIs certified** 10-19	**Number of APIs certified** 20+	**Number of APIs certified** 50+
Marketing Each API entered in certification table	**Marketing** Congratulations through TM Forum Social Media channels	**Marketing** Bespoke 'My API Story' created by TM Forum for your company	**Marketing** Customized joint marketing package (e.g. Global Architecture Forum webinar, press release...)	**Marketing** A bespoke video interview on 'My API Story' created by TM Forum for your company

Members may certify the same API in different implementations (eg in two different commercial products), in which case each certified API implementation will count independently towards earning the tier badges.
