*Company Name:* **Etisalat**

*TM Forum Open API Name:*  
**TMF673 – Address Management**

*TM Forum Open API Release Version:* **4.1.0**

**Report Date: 23/06/2023**

## 1. What Product or Solution does your API support?

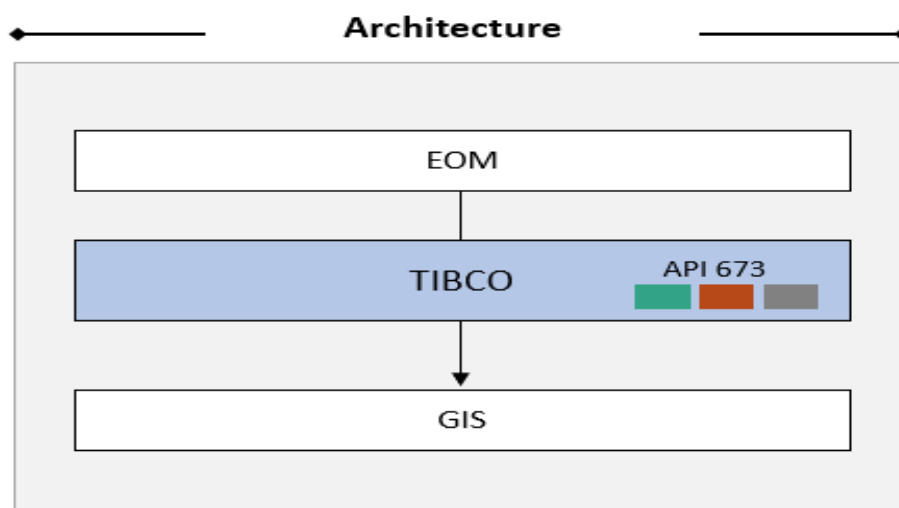

The scope of the requirement is that Etisalat intends to adopt Open API/ODA standards and become a TM Forum Open API compliant, the objectives behinds this adoption are to achieve plug-and-play interoperability of components within their IT systems, reduce complexity and enable digitization of customer-facing systems and reduce cost of integration as well as time to market for new services digital services, TMF 673 Address Management is chosen to be implemented as part of this project.

## 2. Overview of Certified API

The Geographic Address API (TMF 673) provides a standardized client interface to an Address management system, it allows looking for worldwide addresses, It can also be used to validate geographic address data, to be sure that it corresponds to a real address, it can be used to look for a geographic address by: searching an area as a start (city, town ...), then zooming on the streets of this area, and finally listing all the street segments (numbers) in a street.

## 3. Architectural View

The below diagrams illustrate the situation after introducing the TMF API layer
